Item 8: 8 Nelson Regional Sewerage Business Unit Long Term Plan Submission
Feedback Report: Attachment 1

Nelson City Council LTP submissions relevant to NRSBU

Submission 1:

4.

Wastewater

We support planned renewals of the wastewater network and forward planning to move the wastewater treatment plant away from its current climate vulnerable location.

Note: This submitter provided the same feedback to TDCs LTP

Submission 2:

Draft Infrastructure Strategy - Wastewater discharge into the Haven

Nelson Yacht Club's community of water users relies on a safe and unpolluted marine environment. Our privilege to be able to share this environment comes with responsibility. We strongly encourage the council to prioritise the management of, and investment in, our stormwater and wastewater infrastructure, to ensure that this environment is protected from wastewater discharge, before further growth and intensification takes place. Our environment is where it all ends up if things go wrong.
